

# WATCHARA TONGYODPUN

## FULL-STACK DEVELOPER

Chatuchak, Bangkok | +66 65-701-9971 | watchara.ddev@gmail.com

### PROFESSIONAL SUMMARY

Full-stack developer with 4+ years of experience building and maintaining enterprise applications across modern and legacy technology stacks. Experienced in ASP.NET-based systems, JavaScript and TypeScript frontends, Oracle and SQL Server databases, finance and approval workflows, document security, production troubleshooting, and system modernization. Strong focus on maintainable architecture, performance, reliability, and AI-assisted software development.

### TECHNICAL SKILLS

**Primary Stack:** C#, ASP.NET MVC, ASP.NET Core, Spring Boot, JavaScript, TypeScript, HTML, CSS, SQL

**Frontend:** Angular, Vue.js, jQuery, Ajax, Bootstrap, Tailwind CSS

**Backend & Legacy Technologies:** REST APIs, Swagger/OpenAPI, Java, PHP, Classic ASP, VBScript, XML/XSLT

**Databases:** Oracle, SQL Server, PostgreSQL, MySQL; schema design, indexing, query optimization

**AI-Assisted Development:** Prompt engineering, code analysis, debugging, documentation, and workflow support using Claude Code, ChatGPT, Codex, AntigraVity, and GLM-based tools

**DevOps & Tools:** Docker, Git, GitLab, Linux CLI, Postman, DBeaver, Visual Studio, VS Code

**Languages:** Thai (Native), English (Basic)

**Certifications:** IC3 Digital Literacy GS5; Automate Tester Bootcamp 2025

### WORK EXPERIENCE

#### Programmer — Probit Solutions Co., Ltd. (formerly Probit Digital Co., Ltd.)

Nov 2024 - Present | Bangkok, Thailand | Hybrid

- Develop and maintain enterprise applications based on system analyst specifications, business requirements, and UI design guidelines.
- Build responsive and accessible user interfaces and integrate them with backend services and Oracle databases.
- Investigate production incidents, perform root-cause analysis, and implement corrective and preventive solutions.
- Contribute to application architecture and code improvements that strengthen readability, testability, maintainability, and scalability.
- Coordinate with system analysts, backend developers, infrastructure teams, and business users to deliver enhancements and resolve issues.

#### Software Developer — Max Savings (Thailand) Co., Ltd.

Mar 2022 - Sep 2024 | Bangkok, Thailand | On-site

- Developed and maintained features for the CryptBot Hi-Secure e-Office system using Classic ASP, VBScript, XML/XSLT, and SQL Server.
- Designed and optimized SQL Server databases, including schema design, indexing, query tuning, and data maintenance.
- Maintained document security through encryption, role-based access control, and integration with digital-signature systems.
- Supported finance and document workflows, including approvals, reporting, traceability, and audit requirements.
- Performed system maintenance, patching, backup and restore, monitoring, troubleshooting, and incident response.
- Prepared technical documentation and coordinated with IT, finance teams, and external vendors to implement system improvements.

### SELECTED TECHNICAL EXPERIENCE

- Enterprise finance and approval workflows: document routing, advance and clearing processes, approval logic, reporting, and auditability.
- Legacy-system maintenance and modernization: analysis of Classic ASP and XML/XSLT applications, database improvements, and gradual code-quality enhancements.
- Production support: log analysis, database troubleshooting, deployment coordination, incident investigation, and preventive remediation.
- AI-assisted engineering: use of prompt-driven tools to support code understanding, debugging, technical documentation, and development workflows.

### EDUCATION

#### Bachelor of Science in Computer Science

Nakhon Pathom Rajabhat University | 2018 - 2022 | GPA 3.40

Senior Project: Primary Care System for Health Data Analysis
